"There is no requirement for the sequence of the supplies when operating in two-supply mode." from DP83867 1GbE PHY datasheet. We are using the 2 supply mode.

A First chose 0805 capacitors (2170-0005) because thought they might fit the layout better but the 0603 (2167-0010) actually fit better and are used by LT3071.
